

F-86K Sabre Jet

ANOTHER PRODUCT OF NORTH AMERICAN AVIATION, INC.

WING SPAN 37'1-1/4"
 HEIGHT 15'
 LENGTH 40'11"
 POWER PLANT J47-GE-17B

U.S. AIR FORCE YF-86K SABRE
 NORTH AMERICAN AVIATION, INC.

Basically the same as the F-86D, the F-86K Sabre Jet is a single-place, high-performance, high-altitude, all-weather interceptor. Power is supplied by a General Electric J47-GE-17B jet engine, which incorporates an afterburner for added thrust and an electronic control system that automatically regulates fuel flow and controls engine speeds, exhaust velocities, and exhaust temperatures for best performance under any conditions.

Armed with four rapid-fire 20 MM cannons and utilizing the most advanced electronic equipment, the F-86K is capable of effectively seeking out and intercepting hostile targets. The fire control system provides both radar and optical tracking to locate and indicate to the pilot the proper collision course to follow and when to fire the cannons.

COLORING NOTES
 ENTIRE AIRPLANE POLISHED ALUMINUM
 ALL LETTERING AND MARKINGS (UNLESS OTHERWISE NOTED) BLACK
 NATIONAL INSIGNIA RED, WHITE AND BLUE
