The M1028 canister cartridge provides United States Army and Marine Corps M1A1/A2 Abrams with a quick-response, highly lethal, direct fire capability to defeat tactical threats while operating in an urban environment. The canister cartridge is used to clear enemy dismounts, break up hasty ambush sites in urban areas, clear defiles, stop infantry attacks and counter-attacks, and support friendly infantry assaults by providing cover-by-fire.

Additionally, the M1028 reduces the chances for collateral damage associated with high explosive multi-purpose rounds when used in urban terrain and close combat.

120mm Anti-Personnel Canister Cartridge

The M1028 canister cartridge provides United States Army and Marine Corps M1A1/A2 Abrams with a quick-response, highly lethal, direct fire capability to defeat tactical threats while operating in an urban environment. The canister cartridge is used to clear enemy dismounts, break up hasty ambush sites in urban areas, clear defiles, stop infantry attacks and counter-attacks, and support friendly infantry assaults by providing cover-by-fire.
