The PGU-46 is a modification of the PGU-13 HEI, adding a non self-destruct, Orbital ATK Low Drag fuze. The Low Drag fuzes produced exclusively by Orbital ATK, provides superior performance at extended ranges. These rounds are used with the Mk44 and GAU-23 or any cannon firing 30mm x 173mm ammunition.

Characteristics:
- Cartridge length: 290mm
- Cartridge case length: 173mm
- Cartridge weight: 665g
- Projectile weight: 362g
- Propellant weight: 148g
- Propellant type: Single Base
- Cartridge case material: Aluminum
- Primer: M36A2 Percussion
- Fuze: Orbital ATK151-LD
- Muzzle velocity: 3,540 fps/1,079 m/s
- Chamber pressure: 423 MPa
- Dispersion: 0.7 mr radial (max)
